DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
2. The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
 - I. Regarding Claim 1, it is unclear what is meant by the phrase "linked and supported on a polymer film." It is unclear whether this limitation requires that the catalyst be bonded to a polymer molecule of the film or whether this is not necessarily required.
 - II. Regarding Claim 2, it is unclear what is meant by the phrase "linked and supported on a polymer chain." It is unclear whether this claim is further limiting of the requirement of Claim 1 of linking and supporting on a polymer film. It is unclear what is the relationship, if any, between the polymeric film and polymeric chain. It is unclear whether this limitation requires that the catalyst be bonded to a polymer molecule of a chain or whether this is not necessarily required.
 - III. Regarding Claim 5, it is unclear what is the antecedent basis of the phrase "the polymeric chain."

Claim Objections

4. Claim 2 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is

Art Unit: 1775

required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 2 is objected to for not being further limiting because Claim 2 may not require support on a polymeric film, but rather support on a polymeric chain, which may constitute broader subject matter.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
6. A person shall be entitled to a patent unless –
7. (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
8. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Harmer et al. USP 6,034,290. Harmer teaches a polymer supported Lewis acid catalyst comprised of PFIEP polymer that is linked through sulfonic acid groups to ruthenium chelated catalyst. See Harmer (Abstract; col. 4, lines 15-58; col. 5, lines 21-33; col. 5, line 66 through col. 6, line 11; col. 6, lines 49-59; col. 10, line 50 through col. 11, line 11; col. 16, lines 19-62).

Allowable Subject Matter

9. Claims 4-8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims. The subject matter of Claims 4-8 is not taught or suggested by the prior art of record nor by the reviewed prior art. Particularly, the claimed spacer chain of Claim 4, the claimed

Art Unit: 1775

polymer chain of Claim 5, the claimed M elements of Claim 6, and the reaction method of Claims 7 and 8 are not taught or suggested.
